Tagital T9X Battery Replacement

Replacement for the battery on a Tagital T9X.

Written By: Adam Bamforth

INTRODUCTION

Use this guide to replace the battery in the Tagital T9X.

TOOLS:

- 64 Bit Driver Kit (1)
- iFixit Opening Tools (1)
- Spudger (1)

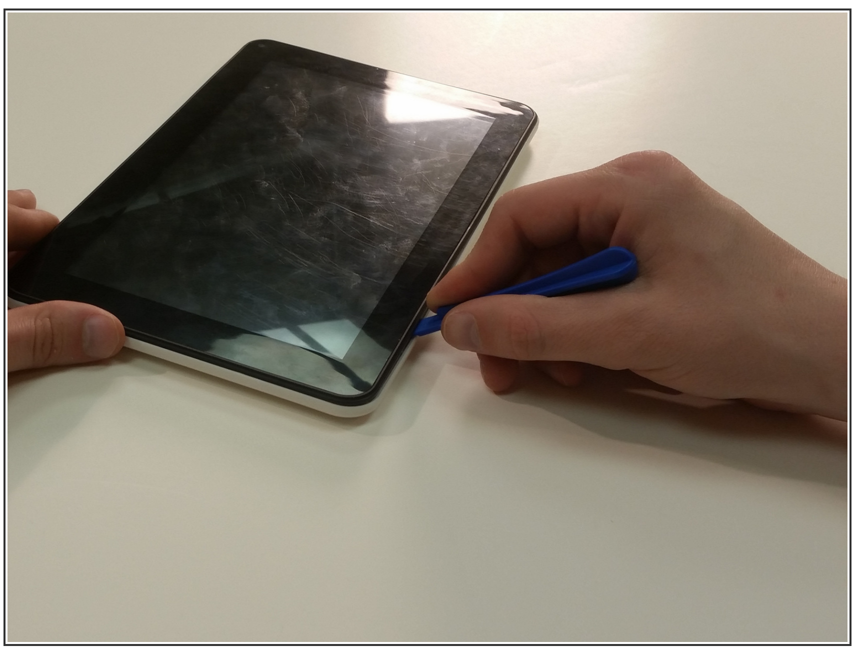

Step 1 — Back Cover

- With the tablet turned off, remove the two 5mm Phillips head screws from the top of the tablet.

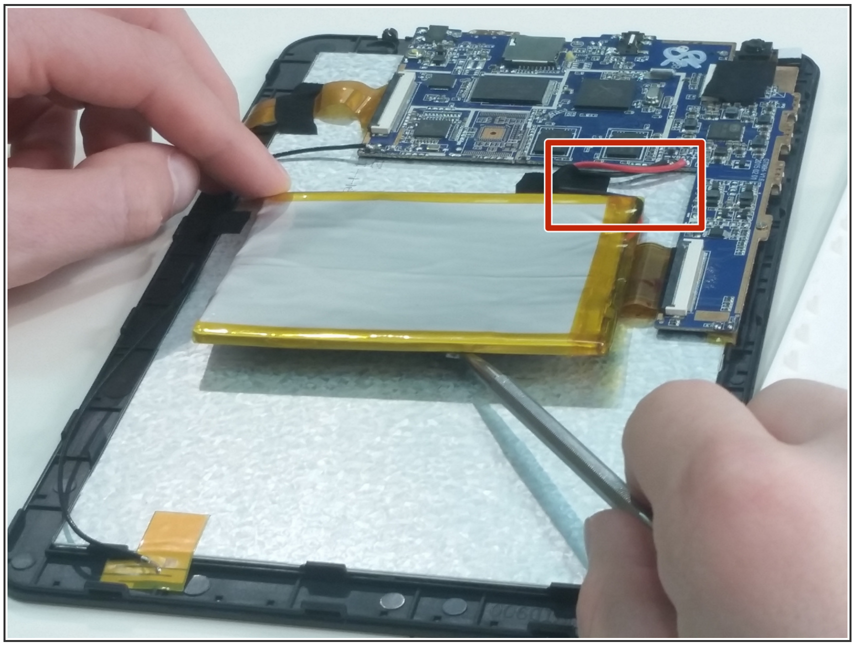

⚠ These screws are extremely easy to lose. Be sure to store them in a safe place.

Step 2

- Use a 1 cm wide plastic opening tool to remove the back panel. Go around the entire back panel to ensure safe removal.
- The power, return, and volume buttons are not firmly secured to the panel; it is likely they will fall off in the process of removing the panel.

Step 3 — Battery

- Using a plastic spudger, carefully pry the battery from its position. Ensure that you do not puncture or bend the battery in this process.
- The only wires for removal are the red and black wires that are soldered into the battery and motherboard.

To reassemble your device, follow these instructions in reverse order.
